Hi Tiffany,

Solo Power has a pretreatment permit through the City. They have been inactive for several years, but maintained the permit and submitted no discharge certifications. We have conducted annual inspections at the facility with the last being in August 2018. Our concerns are with the chemicals at the site and ensuring they are managed properly as well as closing out their pretreatment permit. Our permit manager, Nick Cisney, for Solo Power has reached out to Jay to try and coordinate on inspection activities.

Thanks for the heads up on TFC waste going PPV. I've copied PPV's permit manager, Derek Gill.

Hi Dan

DEQ has not had a point source NPDES permit with Solo Power. Do you have any concerns about this site?

Also, I understand from Laura Kerr that TFC, through Clean Harbors, sent some non-HW liquids to PPV Inc. I don't yet have the documentation—she is going to send that to Jay Collins as part of his oversight of the HW management.

Please feel free to call me if you have questions or concerns.

All- Please see below. Before I dive into the details as it relates to stormwater, are there any other programs that have outstanding regulatory/financial requirements for SoloPower that I should coordinate with?

Thanks-  
Christine

**Subject:** 12-Z SoloPower Closed - no termination form

Hi Jenni,

We have a 1200-Z permitted facility that is out of business but we have been unsuccessful in getting them to fill out a permit termination form. Based on this article – we are not the only ones they refuse to deal with...[https://www.oregonlive.com/business/index.ssf/2018/08/state\\_agency\\_kept\\_shoveling\\_mo.html](https://www.oregonlive.com/business/index.ssf/2018/08/state_agency_kept_shoveling_mo.html)

Do you know if DEQ has a protocol for dealing with this? Their permit assignment documents are attached. All mail we send gets returned and based on our inspection last year the site is no longer occupied. They currently have a monitoring waiver for being an inactive unstaffed site with no industrial materials/activities exposed to stormwater.

I thought I would start with you on this but please let me know if I should start with someone else.

Thanks,
